A publication of the Government Statistical Service

Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone 01–930 5422 Ext. 602.

Enquiries about orders and subscriptions should be made to the publisher, Her Majesty's Stationery Office, PO Box 569, London SE1 9NH. Telephone 01-928 6977.

INTRODUCTION

This Digest has been prepared by the Central Statistical Office in collaboration with the Statistics

Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the Digest are mainly totals for calendar months or monthly averages.

Some of the figures included in this Digest are provisional and may be revised in later issues.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed defi-nitions of all the terms and units used in the Digest. The following general definitions should be noted in using the Digest:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb. Tonne = 1,000 kilogrammes Gallon = imperial gallon

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

.. not available

- nil or less than half the final digit shown

* average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Supplementary tables

Supplementary tables published recently in the Digest are listed below, together with the date of issue in which they appeared:

Projected total population of the United Kingdom June 1973

Index of industrial production, monthly figures for the years 1968 to 1971 October 1973

Changes in content

Table 14. Distribution of working population. Estimates from June 1971 are now based on the Census of Employment.

Table 33. Index of industrial production. This table has been further expanded to include an analysis by market sector.

Table 109. Educational building in Great Britain. The figures for England and Wales are now of Projects started instead of Projects approved as shown previously.

Central Statistical Office, Great George Street, London, SWIP 3AQ

⁽¹⁾ Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3.

(2) This represents taxes on expenditure less subsidies valued at constant rates.

Before providing for depreciation and stock appreciation.

Employers' contributions to national insurance, etc. and pension funds.

National insurance benefits, family allowances, assistance grants, war pensions and service grants, etc.

Income from rent and self-employment, before providing for depreciation and stock appreciation,

dividend and net interest receipts and transfers to charities from companies.

(5) Including from 2nd quarter 1973 tax credits on dividends.

(6) Including from 2nd quarter 1973 imputed tax payments set against tax credits on dividends less payments of these tax credits by the Inland Revenue.

(7) Equals total personal income before tax less payment of taxes on Income, national Insurance, etc.

contributions, and net transfers abroad.

(*) Before providing for depreciation, stock appreciation and additions to tax reserves.
(*) Personal saving as a percentage of total personal disposable income is shown in italics.
(*) Personal disposable income revalued by the price index for consumer goods and services (1970 = 100).

⁽¹⁾ Estimates for June 1969(a) are classified according to the Standard Industrial Classification 1958 and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification 1968.

Sources: Department of Employment Ministry of Health and Social Services (Northern Ireland)

⁽²⁾ See footnote (1) to Table 16.
(3) The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification 1958 and Orders II-XXI of the Standard Industrial Classification 1968.

⁽⁴⁾ Excluding private domestic service.
(5) The estimates of agriculture are taken from the June censuses of agriculture and exclude a small number of employees of agricultural machinery contractors. It should also be noted that the figures include seasonal and temporary workers.

(1) (a) Until 1971 the annual employment statistics were derived mainly from counts of national insurance cards. In 1971 a new system was introduced because of proposals to abolish the use of national insurance cards for employees within the next few years.

(b) The new system relies on returns from employers. In order to provide a link between the old system and the new system, both a card count and a census under the new system were taken in 1971. Only a census was taken in June 1972. The results of the census in 1971 have been reprocessed to provide a basis for comparison with 1972.

(c) The old count of national insurance cards included many employees who work for part of the year only and who would not have been in employment in the particular week in June when the census was taken. Mainly for this reason the census figure for June 1971 is considerably lower than the card count. Another difference is that a person who had two regular jobs with different employers in the week of the census was counted twice in the census but only once in the card count, so that the census figures are higher than the card count in some industries and services where secondary employment is common.

Note: Figures have been rounded independently, thus there may be an apparent slight discrepancy between the sum of the constituent items and the total.

(1) The figures include established and unestablished non-industrial and industrial staff but exclude casual or seasonal staff (recruited for periods of normally less than six months) and employees of the Northern Ireland Government. Two part-time employees are counted as one whole-time employee.

(2) The figures prior to I July 1972 have been adjusted to show staff in current Ministerial areas so that the figures in all columns are on a comparable basis.

Defence and may be subject to later amendment.

(3) Excluding headquarters staff, but including research and development establishments and Royal Ordnance factories. (4) These figures include estimated breakdown of certain staff recently transferred to Ministry of

Numbers of workers employed in agriculture

⁽¹⁾ The numbers of workers returned from June 1970 onwards are not comparable with those returned in previous years because of changes in the census in the coverage of labour in England and Wales. These changes comprised:

(a) extending the concept of farm work to include managerial and secretarial work;

(2) includes family workers but excludes farmers' wives.
(3) Including regular part-time workers.

Sources: Agricultural Departments

⁽b) requesting for the first time the separate return of farmers, partners and directors; and (c) defining, from 1970 to 1972 'regular whole-time' workers as those engaged in work on the holding for 40 hours or more per week and 'regular part-time' as those engaged for less than 40 hours per week.

Note: This table has been revised and Is now based on information from the Census of Employment

(5) In February 1972, the volume of overtime and short-time was affected by the power crisis.
(6) Figures after June 1972 are provisional and are subject to revision when the results of the 1973 Census of Employment are available.

23

⁽see footnote (*) to Table 16). The estimates are not comparable with estimates prior to June 1971 which were based on mid-year counts of national insurance cards.

(*) Orders III-XIX of the Standard industrial Classification 1968.

(*) Figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

⁽³⁾ Excluding maintenance staff.
(4) Operatives stood off for the whole week are assumed to have been on short-time to the extent of 40 hours each.

Unemployment(')

Note: The presentation of unemployment statistics in this and succeeding tables has been revised on the lines recommended by an Inter-Departmental Working Party Unemployment Statistics (Cmnd. 5157). See Department of Employment Gazette, November 1972.

(1) The figures in this table are adjusted to take into account amendments notified on the four days following the date of the count. Figures for married females from May 1972 onwards are not adjusted.

(2) Total in preceding column expressed as a percentage of the estimated total number of employees.

of employees.

(3) The method of seasonal adjustment is described in the Department of Employment Gazette, August 1972 and details of the latest revisions are published in the March 1973 issue (News and Notes).

⁽¹⁾ Including ex-service men and women and other unemployed persons aged 18 years and over not classified to an industry. Unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) and adult students seeking temporary employment during vacation are excluded. The All industries figures are adjusted to take into account amendments notified on the four days following the date of the count. All other figures from May 1972 are not so adjusted.

(2) Total in the preceding column expressed as a percentage of the estimated total number of employees.

(3) The method of seasonal adjustment is described in the Department of Employment Gazette, August 1972, and details of the latest revisions are published in the March 1973 issue (News and Notes).

⁽¹⁾ Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost exceeded 100. The figures for 1973 are provisional.

(2) From January 1970 the analysis by industries is based on the Standard Industrial Classification 1968. Figures prior to that date are based on the Standard Industrial Classification 1958.

(3) Where stoppages extend over more than one month, the workers involved are counted in the month in which they first participated.

(4) The figures of working days less relate to the control working days less relate to the control working days.

⁽⁴⁾ The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(1) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.

2) Invalidity benefit was introduced on 23 September 1971. (3) Including prescribed industrial disease. (4) Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

(5) These figures include substantial numbers of persons who have been sick for a long time and who may

no longer be in employment.

(6) Up to June 1971, these estimates are based on a standing sample of claimants. Subsequent figures are provisional estimates derived from the numbers of new claims and will be replaced later by final estimates from the sample. Yearly figures are averages of twelve monthly figures.

(7) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May, August and November.

(8) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Acts 1970 and 1971.

(9) Including a diminishing number of widows with pensions of 30s a week derived from the old Contributory Pensions Acts. (10) Figures for 1973 are provisional.
(11) Including the elder or eldest child for whom no allowance is payable.

* Average of five weeks.

(¹) Pension age means 65 years for men and 60 years for women.
(²) Some of the supplementary pensions provide for the requirements of a

household with more than one pensioner.

(3) Includes a small number of persons over pension age.
(4) The quarterly count of Supplementary benefit recipients was not conducted for that month.

⁽¹⁾ For a description of this series, see the article on page 360 of the April 1971 issue of Department of Employment Gazette.
(2) Quarterly estimates are derived as averages of the monthly figures.
(3) In the absence of an earnings index for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit of output has been calculated for that month. Less reliance than usual can be placed on the latter index for January and March 1972.

(1) Excluding agricultural holdings of one acre or less in extent in Great Britain until 1969. With effect from June 1970 the census was extended in Great Britain to cover all holdings with significant output including those on one acre of agricultural land or less, at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland excluding holdings of less than one acre until 1972 but numbers of livestock in Northern Ireland were collected

Sources: Agricultural Departments

from all owners (including landless stockholders). As from June 1973 about 8,000 statistically insignificant holdings were excluded from the census in Northern Ireland. At the same time some 2,000 statistically significant holdings with less than one acre of land were brought fully into the census: previously these were included in the census only to the extent of obtaining an estimate of the numbers of livestock on them. (2) Excludes Scotland. (3) Includes maize for threshing in England and Wales. (4) Weight in pods. (5) Shelled weight. (5) England and Wales only. (7) Clover and rotation grasses including lucerne in England and Wales. (8) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed: the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (9) Includes hay from lucerne in England and Wales and from permanent grass in Scotland. (10) Includes the total area of deer forest land in Scotland.

(1) Excluding castor meal, cocoa cake and meal.
(2) From July 1973, disposals and stocks of oilcake and meal will be shown as an aggregate figure only, as a breakdown between high and medium protein and low protein is no longer available.
(3) Including maize meal.
(4) 53 week period.

⁽¹⁾ Sales through the Milk Marketing Schemes. (2) The provision of liquid milk at a reduced price was officially withdrawn from April 1971. Approximately 51 million gallons were sold in 1971 up to that time. (3) Whole and skimmed. Excluding skim concentrates and condensed milk used in the manufacture of chocolate crumb. (4) Excluding buttermilk and whey powder. (5) Figures are based on milk usage. (6) Excluding farm production. (7) Cold store stocks. (8) Importers', manufacturers' and factors' stocks. (9) Manufacturers' stocks only. (10) 53 week period.

⁽¹⁾ From January 1971, figures relate to sales by manufacturers in Great Britain employing 25 or more persons, and who are classified to MLH 274 (paint). The figures also include sales of principal products of this industry by establishments classified to MLH 271 (general chemicals) and MLH 494/1 and 2 (toys, games and children's carriages). From third quarter 1971, the figures relate to sales by manufacturers in the United Kingdom.

⁽¹⁾ Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings

^(*) industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes.

(*) From July 1971 figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 279/1 (polishes).

(*) A short standard is 7,200 matches.

					1				1					

⁽¹⁾ At steel works and steel foundries.
(2) At steel works, steel foundries and blast furnaces.
(3) Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1970 and March 1973 the figures are revised due to re-measurement.
(4) From January 1971, figures include stock of semi-finished steel for the manufacture of heavy products previously not reported.
(5) The figures for 1970 onwards include deliveries of welded tubes over 16 inch outer diameter.
(6) 53 week period.
(7) Average of fourteen weeks.

* Average of five weeks.

Supplies and deliveries of steel

NOTE: Tables showing detailed information about the mechanical, instrument and electrical engineering industries up to the end of 1971 last appeared in the March 1973 issue of the Monthly Digest (Tables 78-83). It is proposed to re-introduce similar tables later in 1973 when information collected under the new system of industrial statistics is available.

ENGINEERING

Mechanical, instrument and electrical engineering industries

(1) Including chassis delivered as such by manufacturers. The value of deliveries of commercial vehicles is

(3) Complete and chassis.

⁽²⁾ Beginning in 1973 the headings under which data are collected were changed. The new heading of Car derivatives (i.e. vans derived from car chassis) has virtually the same coverage as the heading it replaced, Commercial vehicles not over $1\frac{1}{2}$ tons. Although not all commercial vehicles under $1\frac{1}{2}$ tons gross vehicle weight are classed as car derivatives and it is also possible for car derivatives to exceed $1\frac{1}{2}$ tons gross vehicle weight, the difference between the two categories is small as far as UK production is concerned. The series as given may therefore be regarded as sufficiently continuous for the analysis of trends. The combination of the two series, car derivatives and commercial vehicles under 10 tons gross vehicle weight is identical in coverage with the sum of the two series that have been superseded.

Complete and chassis.

(4) 53 week period.

* Five week period.

Merchant shipbuilding(1): tankers of 300 gross tons and over(2) Orders on hand and completions

⁽¹⁾ Spinning, doubling processing and weaving parts of the cotton industry, plus man-made fibre, wool, carpets and hosiery industries.

(2) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations.

(3) The index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry and not output of that particular type of garment.

⁽¹⁾ The coverage of the inquiry from which this table is compiled was extended at the end of 1970 and the earlier figures have been adjusted to provide a broadly comparable series. It must be emphasised, however, that the conversions have been based on linking factors spanning the 4th quarter 1970 and 1st quarter 1971 only and they should be treated with caution.

⁽¹⁾ I tonne = 0.63 tonne paper equivalent (air dry weight).
(2) Including home-grown pulpwood, wood waste, chippings and rejected pit props.
(3) Including woodpulp for cellulose wadding.
(4) For the manufacture of rayon and transparent cellulose film.

⁽¹⁾ From the 3rd quarter 1971 information was collected on a slightly different basis; the figures, therefore, are not fully comparable with those for earlier periods. A link between the two sets of figures is shown in the March 1972 edition of Business Monitor, P. 9, Carpets.
(2) Prior to the 3rd quarter 1971 these figures relate to woven carpets faced with more than 50 per cent of man-made fibres.
(3) Prior to the 3rd quarter 1971 export figures are those reported directly by manufacturers. From that date they are those recorded in the Overseas Trade Statistics.

(') Excluding building which is wholly financed from private sources. (2) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building. has been included as appropriate under the headings Primary and secondary and Special schools. (3) Figures for England and Wales include the value of projects for which specific approval is not required. (4) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (5) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain minor projects for which specific approval is not required. (6) The Scotland figures of projects approved refer to approval at the sketch plan stage, which might be some six to twelve months before the start of construction. (7) The Scotlish figures of Under construction and Completions are based on the tender costs. The Under construction and Completions figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

⁽¹⁾ The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(2) Including new schools brought into partial use before completion.

(3) Extensions, alterations, remodelling and war damage repairs.

⁽¹⁾ Passenger journey figures for 1969 and subsequent years are not strictly comparable with those for previous years, owing to the transfer from British Rail to London Transport railways of the Bow to Upminster line on I January 1969 and of the London Paddington to Westbourne Park service on I January 1970. In addition, the new 14 mile Victoria Line was opened to traffic by London Transport in four stages on I September and I December 1968, 7 March 1969 and 23 July 1971. (2) The four-weekly averages for each year are computed from calendar year totals.

	August September													

(1) Scheduled services only. All kilometre statistics are based on standard (Great Circle) distances.
(2) Slight discrepancies between certain totals and the sum of their constituent items are attributable to the rounding of figures.
(3) Including weight of vehicles uplifted on vehicle ferry services, mail, excess baggage and diplomatic

			1						

Note: The statistics are on an Overseas Trade Statistics basis (see footnote (1) to Table 140).
(1) Sterling area outside Western Europe equals Sterling area less Irish Republic, Iceland (Developed) and Gibraltar, Malta (Developing).
(2) For 1972 and earlier years the figures for Pakistan include those for East Pakistan now Bangladesh.

^{(&#}x27;) Statistics of visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics. These adjustments are summarised in Table 141 below; they are described in detail in United Kingdom Balance of Payments 1973.

(2) Export unit value Index as a percentage of the import unit value index. (3) Affected by the

(4) Provisional. dock strike.

(1) The total currency flow, together with Allocation of Special Drawing Rights and Gold subscription to the IMF. (2) From July 1972 transactions with IMF affecting the United Kingdom reserve position in the Fund are included as changes in the official reserves. (3) From 23 August 1971, valued in sterling at transactions rates of exchange. Therefore, from the third quarter of 1971 the sterling valuation of the flow does not equal the difference between the opening and closing levels which are converted at parity in Table 145.

(1) Figures are calculated to end-September 1971 at \$2.40=£1, from end-December 1971 to end-January 1973 at \$2.6057=£1 and from end-February 1973 at \$2.89524=£1. (2) Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries. From July 1972 excludes transactions affecting the United Kingdom gold tranche. (3) Borrowing from other monetary authorities, and a consortium of Swiss banks in 1967, in the form of foreign currency deposits or assistance with a sterling counterpart. (4) From July 1972, the official reserves were redefined to include the reserve position in the IMF. From end-April to end-June 1972, this stood at £292 million.

⁽¹⁾ In addition to its lending, the National Loans Fund meets the interest and management charges of the National In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (2) Loans under the Ship Credit Scheme and to the Shipbuilding Industry Board, housing associations and building societies. (3) Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer.

(1) This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any

increase (or plus any decrease) in its official reserves.

(2) A negative item represents a surplus, a positive item a deficit.

(3) Including in March of each year transfer of surplus of the death duties surrendered securities account.

Sources: HM Treasury
Central Statistical Office

⁽⁴⁾ The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

⁽⁵⁾ Excluding borrowing from the National Loans Fund.
(6) Including surrender of final balance on the local loans fund.
(7) Adjustment for redemption of government guaranteed stock.
(8) Consolidated Fund liability for service of the National Debt: balance carried over until March.

⁽¹⁾ Including some land tax, mineral rights duty, excess profits duty and special contribution, not included under separate headings. Including profits tax, excess profits tax and excess profits levy from April 1969. Including special charge from April 1971. (2) Payments due in certain cases where the overseas rate exceeds the corporation tax rate (Section 84, Finance Act 1965). The figures relate to calendar months. (3) The yearly totals include revisions which cannot be allocated to particular monthly periods.

^(*) Including government debt £11·0 million. (2) Other securities, coin and until 6 August 1970, gold coin and bullion. (3) Including Capital £14·6 million. (4) Until 15 September 1971 deposits called from the London and Scottish clearing banks, not at their free disposal. Thereafter deposits called from all banks, not at their free disposal. (5) Before 18 August 1971 Other accounts and rest. (4) Certain changes in the composition of these accounts were made from 28 February 1971 reflecting certain changes in the treatment of reserves. Following the publication on 28 July 1971 of the Bank's Report and Accounts certain other minor changes were made mainly affecting the titles of accounts. See footnotes (5), (7), (4) and (9). For full details see the Additional Notes to Table 5 in the Bank of England Quarterly Bulletin. (7) Before 18 August 1971 Discounts and advances.

(*) Before 18 August 1971 Other securities. (*) With effect from 29 July 1971 Treasury bills discounted for customers were incorporated in Government securities instead of in Discounts and Advances.

Including currencies of overseas sterling countries; the figures may be affected by changes in exchange rates.
 Figures are shown before and after the inclusion of new contributors.
 From July 1973 issue, the second line reflects revisions to certain items by the Scottish clearing banks.

(1) Figures are not strictly comparable throughout owing to changes in the composition of the clearings. From 12 January 1968 provincial clearings, with the exception of the afternoon clearing at Liverpool, were abolished and transferred to General clearing. From I July 1969 all figures are worked on a 5 day week.

(2) Average of Wednesdays. Includes Bank of England notes held by the Scottish and Northern Ireland Banks as cover for their note issues in excess of the authorised circulation.

(3) Months: average of Saturdays in the consecutive four-week periods as published in The London Gazette or in The Belfast Gazette, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.

Excluding coin in the Bank of England, Issue Department.

(*) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department, and by the London clearing banks, Scottish banks and Northern Ireland banks.

(*) The values of Town, General and Credit clearings were reduced as a result of mergers among

the London clearing banks. The changes occurred in December 1969 and January 1970 and to a lesser extent in September 1970; their total effect is estimated to have been: Town clearing —8%, General clearing —10%, Credit clearing —11%.

(7) From 20 January until 8 March the figures are affected by a strike of Post Office employees.

(8) Credit clearings; not comparable with earlier figures owing to the exclusion of credit transfers processed by Bankers' Automated Clearing Services.

⁽¹⁾ The annual figures are averages of the figures for February, May, August and November.
(2) Included in Other manufacturing in Northern Ireland.
(3) Excluding funds placed through the specialised financial markets.
(4) The average for 1972 is derived by adding to February figures that amount of fixed rate credits transferred from Bills to Advances in May 1972.

⁽⁵⁾ The two sets of figures show the position before and after the inclusion of £734 million fixed rate credits for exports and domestic shipbuilding (London clearing banks £697 million, Scottish clearing banks £37 million) previously included in Bills discounted prior to May 1972.

(6) Because of difficulties of classification it is not possible to include advances made by the six finance houses recognised or confirmed as banks in January 1972 or January 1973. These totalled £1,711 at mid-May and £1,894 at mid-August.

(7) Figures for May, August and November 1970 are not available due to the effects of an industrial dispute involving bank employees.

Capital issues and redemptions in the United Kingdom(1)

(1) Derived from yield-maturity curves fitted mathematically. The break shows a change in the method: an article in the Bank of England Quarterly Bulletin December 1972 describes the new method of calculating the curve which is now based on the prices and coupons for all stocks except a few with special features. the curve which is now based on the prices and coupons for all stocks except a few with special features. Before 1971, the curve was fitted to yields on stocks with coupons of 5 per cent or more. (The old method was described in the March 1967 Bulletin). The yearly figures are averages of end of month yields. The monthly figures relate to averages of Wednesdays, except for 1971, where they are for end-months. Figures have been revised from January 1973. See article in the Bank of England Quarterly Bulletin September 1973.

(2) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored.

(3) Averages of daily figures calculated from middle market closing prices.

(4) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

(1) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1972, published in the Department of Employment Gazette for February 1973.

(2) From and including October 1967 includes (a) dock workers previously on daily or half daily engagements and

(b) postmen.

(2) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 169 which cover all industries.

Average weekly hours worked(')

^(*) England and Wales only. (2) Except sea transport and postal services. (3) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes.
(4) For notes on the index classified according to Standard Industrial Classification 1968, see pages 470-471 of the Employment and Productivity Gazette for May 1970. (*) Because of the coal mining dispute a reliable index for Mining and quarrying cannot be calculated. The December 1971 figures for coal mining have been used in the compilation of the index for All industries and services covered, and for the Mining and quarrying 1972 annual average.

Index of average earnings of all employees (monthly enquiry)

Great Britain

(6) As industrial activity was severely disrupted by restricted electricity supplies the monthly survey was not carried out in February so figures cannot be calculated for this month. (7) Provisional. (8) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for All industries and services covered.

Average weekly earnings of manual workers in certain industries(')

⁽¹⁾ The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the Department of Employment Gazette.

(2) In general, males under 21 and females under 18 years of age.
(3) The term Manufacturing industries covers all industries included in Orders III-XIX of the Standard Industrial Classification 1969.

Classification 1968.

(1) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(2) The monthly totals in the columns headed Increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed Net increases, is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

General index of retail prices

⁽¹) The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.
(²) These are the weights which would have been used in 1968 if expenditure on meals out had been

(2) These are the weights which would have been used in 1968 if expenditure on meals out had been treated as in previous years (see footnote (1)). The weights actually used are given in the following line.

General index of retail prices(') Indices for sub-groups 16 January 1962 = 100

^(*) Reductions in the VAT-exclusive prices of alcoholic liquor, tobacco and cigarettes, matches and mechanical lighters took place in April. These reductions resulted from lower revenue duties designed to offset additional tax revenue from VAT. With unchanged prices in April for these products index numbers for months from April onwards would have been higher by the following: all manufactured products 1-7; chemicals and allied industries 0-2; products of manufacturing industries other than food, drink and tobacco and engineering and allied industries by less than 0-05

(1) Based on manufacturers' list prices.
(2) The market-price series are based on prices before the addition of subsidies when paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(3) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies when paid to producers; that for milk on prices paid to producers by the marketing board and that for potatoes on producer prices, sometimes supported by the Potato Marketing Board.

(4) Maincrop potatoes only.

(5) Based on BEMB prices to producers under the Egg Contract Schemes until March 1970. From April 1970 until March 1971 based on guaranteed minimum prices to producers at packing stations and thereafter on average price paid to producers at packing stations.

(6) Based on net prices to farmers after deduction of subsidy.

(7) Provisional.

National Income and Expenditure 1973

The National Income and Expenditure Blue Book, prepared by the Central Statistical Office, contains detailed estimates of national product, income and expenditure for the United Kingdom. The 1973 edition covers mainly the years 1962–1972. Information is included on personal income and expenditure, company income and its appropriation, public corporations, central government and local authorities, investment, output and expenditure at constant prices and other subjects. A detailed description of the compilation of the estimates is given in National Accounts Statistics: Sources and Methods, prepared by the Central Statistical Office (Studies in Official Statistics, No. 13).

United Kingdom Balance of Payments 1973

This publication (the Pink Book), prepared by the Central Statistical Office, is designed to be a standard reference for balance of payments statistics extending over a long run of years up to 1972. It contains tables showing the general balance of payments accounts for the United Kingdom together with a detailed analysis of many of the items included. These tables are followed by an Annex covering six topics illustrating certain aspects of the balance of payments which do not emerge from the standard form of presentation. The Pink Book also includes a detailed description of the definitions, sources and methods employed in compiling the figures, notes on the reliability of the estimates and references to the main international publications giving balance of payments statistics for other countries.

STATISTICAL NEWS No 23

NOVEMBER 1973

The purpose of this quarterly publication is to put the user of statistics in touch with all that is going on in the world of official statistics. Each issue contains several main articles treating selected topics in depth. Shorter notes report what is new in official statistics. A cumulative index of the contents makes the book a most useful reference source.

The issue, published on November 22nd, contains, in addition to two articles, a section which summarizes amendments to the List of principal statistics series and publications. This section is a regular feature of Statistical News, enabling users of the List to keep it up-to-date. The articles are:

The new Business Monitor Service from the Business Statistics Office

Computer service for management applications in the Civil Service Department by R. F. A. Hopes and D. Wishart.

In addition to these main articles, this issue contains about 50 shorter notes covering a wide variety of topics.
